

[Johari quadrant 1

- 'Open self/area', 'free area', 'public area', 'arena'
- Also known as the 'area of free activity'
- Information about the person - behaviour, attitude, feelings, emotion, knowledge, experience, skills, views, etc - **known** by the person ('the self') and **known** by the team ('others').
- The aim in any team is to develop the 'open area' for every person, because when we work in this area with others we are at our most effective and productive, and the team is at its most productive too
- The open free area, or 'the arena' - the space where good communications and cooperation occur, free from distractions, mistrust, confusion, conflict and misunderstanding

[Team members

- Established members tend to have larger open areas than new team members
- New members start with relatively small open areas because relatively little knowledge about the new team member is shared
- Other members can help a team member expand their open area by offering feedback
- The size of the open area can also be expanded vertically downwards into the hidden or avoided space by the person's disclosure of information, feelings, etc about him/herself to the team and team members
- Can help a person expand their open area into the hidden area by asking the person about him/herself

Increasing open area through feedback solicitation

- Increasing the open area , by reduction of the blind area, by asking for and then receiving feedback
- Can also be developed through the process of disclosure, which reduces the hidden area
- The unknown area can be reduced in different ways: by others' observation (which increases the blind area); by self-discovery (which increases the hidden area), or by mutual enlightenment - via group experiences and discussion - which increases the open area as the unknown area reduces

[Managers and Leaders

- Play an important role in facilitating feedback and disclosure among group members, and in directly giving feedback to individuals about their own blind areas
- Also have a big responsibility to promote a culture and expectation for open, honest, positive, helpful, constructive, sensitive communications, and the sharing of knowledge throughout their organization
- Encouraging the positive development of the 'open area' or 'open self' for everyone is a fundamental aspect of effective leadership

[Johari quadrant 2

- **‘Blind self’ or ‘blind area’ or ‘blindspot’**: what is **known** about a person by others in the group, but is **unknown** by the person him/herself
- Could also be referred to as ignorance about oneself, or issues in which one is deluded
- Not an effective or productive space for individuals or groups
- Also include issues that others are deliberately withholding from a person
- The aim is to reduce this area by seeking or soliciting feedback from others and thereby to increase the open area, i.e., to increase self-awareness
- Team members and managers take responsibility for reducing the blind area - in turn increasing the open area - by giving sensitive feedback and encouraging disclosure
- Managers promote a climate of non-judgemental feedback, and group response to individual disclosure, and reduce fear

[Team

- Which understands itself – i.e., each member having a strong mutual understanding with the team - is far more effective than a team which does not understand each other – i.e., whose members have large hidden, blind, and/or unknown areas
- Members - and leaders - should strive to increase their open free areas, and to reduce their blind, hidden and unknown areas
- Seeking feedback about the blind area will reduce the blind area, and will increase the open free area
- Discovery through sensitive communications, active listening and experience, will reduce the unknown area, transferring in part to the blind, hidden areas, depending on who knows what, or better still if known by the person and others, to the open free area

[Johari quadrant 3

- **'Hidden self' or 'hidden area' or 'avoided self/area' or 'facade'**
- What is **known** to ourselves but kept hidden from, and therefore **unknown**, to others
- Represents information, feelings, etc, anything that a person knows about him/self, but which is not revealed or is kept hidden from others
- Also include sensitivities, fears, hidden agendas, manipulative intentions, secrets - anything that a person knows but does not reveal
- Relevant hidden information and feelings, etc, should be moved into the open area through the process of 'self-disclosure' and 'exposure process'
- Organizational culture and working atmosphere have a major influence on team members' preparedness to disclose their hidden selves
- The extent to which an individual discloses personal feelings and information, and the issues which are disclosed, and to whom, must always be at the individual's own discretion

[Johari quadrant 4

- **‘Unknown self’, ‘area of unknown activity’, ‘unknown area’**
- Information, feelings, latent abilities, aptitudes, experiences etc, that are **unknown** to the person him/herself and **unknown** to others in the group
- Can be prompted through self-discovery or observation by others, or through collective or mutual discovery
- Counselling can also uncover unknown issues
- Again as with disclosure and soliciting feedback, the process of self discovery is a sensitive one
- Uncovering 'hidden talents' - that is unknown aptitudes and skills, not to be confused with developing the Johari 'hidden area' - is another aspect of developing the unknown area, and is not so sensitive as unknown feelings
- Managers and leaders can create an environment that encourages self-discovery, and to promote the processes of self discovery, constructive observation and feedback among team members
- The unknown area could also include repressed or subconscious feelings rooted in formative events and traumatic past experiences, which can stay unknown for a lifetime

[Standard representation]

		Self	
		<i>Known</i>	<i>Unknown</i>
Others	<i>Known</i>	1 Open/Free Area	2 Blind Area
	<i>Unknown</i>	3 Hidden Area	4 Unknown Area
