

Unit I: Communication Process

CLASSIFICATION: EXPRESSION / DIRECTION / MANAGEMENT

COMPONENTS

FEATURES

- **Definition:** Any activity in which information, emotion and feelings are exchanged/ conveyed from one to another is called communication.

Types of Communication: Different classifications are available depending on-

- ✓ Mode of expression
- ✓ Direction
- ✓ Organization

Mode of expression:

1. **Verbal:** Written/ Speaking oral/ sign language/ signage. It can occur as face to face interaction such as personal interviews, lecture, presentations, Group Discussions, etc. or through mechanical devices such as emails, typed letters, fax, texting, memo, telephones, etc. Verbal is further divided as Written and Oral.

- Advantages of oral communication: quick response from receiver, well-supported by gestures, etc.
- Disadvantages of oral communication
- Advantages and disadvantages of written communication.

2. Non-verbal.

Non Verbal Communication

PHYSICAL APPEARANCE

TIME MANAGEMENT

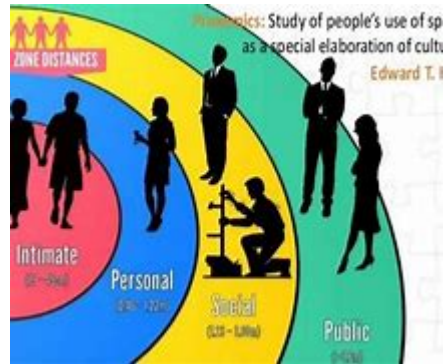

PHYSICAL DISTANCE

TOUCH/ GREETINGS

SILENCE AND PAUSES

Nonverbal communication can be roughly defined as communication through body language/ behavior. It is said that "93% of communication happens through non-verbal cues". The different regimes of non-verbal communication are:

1. **Physical appearance**: during face to face interface, one's body language reveals lot about a person. Some major areas are:
 - Dress-code followed by an individual: this also speaks about the work culture of any place. During any formal interview, dress code is closely monitored.
 - Posture: Fidgeting points towards nervousness, slumped posture indicates low spirit or lack of interest, sitting cross-arms show defensive posture, sitting open arms assures the other person that individual is ready to listen and participate in the interaction.
 - Facial expression: Bewildered looks or blank looks indicate lack of comfortability during an interaction.
 - Eye-contact: Lack of eye-contact clearly indicates lack of confidence.
2. **Proxemic**:

The study of physical distance in any inter-relationship is called Proxemic. It also shows work culture in an organization. The space has been divided into four zones. These are Intimate space (less than 1.5 feet), Personal space (1.5-4 feet), social space (4-12 feet), public space (12 feet or more).

3. **Chronemics:** The study of time-management in an inter-relationship is called chronemics. Overshooting deadlines pose a serious challenge on the commitment of an individual. Being late or not replying in time shows disrespect while arriving early or before time shows eagerness and commitment.

4. **Haptics:** the study of touch in inter-relationship is called haptics. This also speaks about work culture. Handshake/ embrace / NO-Contact at all, etc.

5. **Para-language:** this indicate “beyond language or word”. This involves “how we say things”. For eg. Loud and agitated voice, strong body language, using short and dry sentences, answering in single words, etc, indicate lack of harmony within interaction.
6. **Silence and pauses:** They play an important role in any interaction. Lack of reply from other side indicate barriers in communication. It may also indicate resistance or displeasure. It is important to acknowledge and respect silence and pauses in any relationship.

Direction:

Upward : Students to Dean/ HOD

Downward: Top Management to lower management

Horizontal: Principal to another Principal,

Diagonal: Inter department.

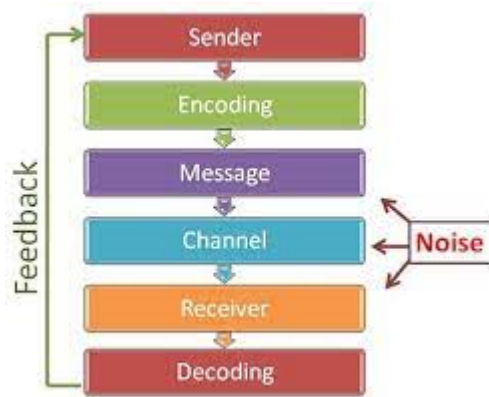

Organization:

- **Formal communication** always well-documented, authorized, goal-oriented and accountable.
- **Informal (Grapevine):** dubious, not documented, ill-defined target, no accountability.

Q. Difference between formal and Informal Communication 10 mark

Q. Grapevine is a necessary evil for the corporate. Comment.

Process of Communication:

1.Sender: Source of message (Not clear about message/ vague instructions/ not clear about target audience)

2.Message: idea, opinion, gesture, picture, sign / thought (Vague language for eg. Urgency vs routine instruction, Mandatory/ Optional)

3.Encoding: converting message into a code can be word/ action/picture/ sign (Short forms, technical jargons, badly constructed sentences, used language unfamiliar to receiver/ certain gestures culture specific)

4.Channel: medium to convey (Illegible handwriting / Poor network/ lost in post and did not reach)

5.Receiver: Target/ audience

6.Decoding : Giving meaningful interpretation to the message (not fluent with language, chances of mis interpretation)

7.Feedback : confusion to consolidation of a message
Importance of feed-back.

ONLY MESSAGE IS TRANSFERRED NOT THE MEANING

Characteristics:

Two way process (Turn Taking) RESPECT SILENCE/ DOCUMENT SILENCE AND GAPS

Information sharing

Circular flow: Room for feedback. To the receiver

Continuous or ongoing

Goal Oriented (Understanding of receiver)

Q. Silence and pauses are important part of any communication process. Do you agree?
